

ACKNOWLEDGMENTS

A great number of people and several organizations contributed substantially to this report. This project was sponsored by the Durham Inventory Review Committee and the Triangle Land Conservancy. It was funded jointly by the Durham County Board of Commissioners and the Natural Heritage Trust Fund. Hildegard Ryals (Chair, Durham Inventory Review Committee) played the key role in initiating this survey. We wish to thank her, as well as the other members of the committee for the material support they provided as well as for their enthusiastic interest in the progress of this investigation.

Contributions of species lists, habitat descriptions, or other ecological information that were incorporated into this report came from: Jim and Liz Pullman, Richard Rettig, Margaret Nygard, George Pyne, Norm Budnitz, Tom Krakauer (NC Museum of Life and Sciences), Jennifer Howard, Chris McGrath and John Alderman (NCWRC), Bill Adams (UC ACE), Steve Brown and John Kent (New Hope Audubon Society). Staff members of the NC Natural Heritage Program who provided information include Scott Hartley, Tom Howard, Dave Cook, Harry LeGrand and Alan Weakley. Access to the Duke University Vertebrate Collection Records—compiled by Dr. Joe Bailey and his students and colleagues—was provided by Alvin Braswell and Bill Palmer of the NC Museum of Natural Sciences, where these records are now archived.

We also thank Vickie Dudick and Rodney Parker (NC National Guard), for arranging permission for the site visit to Camp Butner, and Jane Korest (Durham City/County Planning Department) for providing maps of the city owned lands at West Point on the Eno, Lake Michie, and the Little River Reservoir. John Amoroso and the NC Center for Geographic Information and Analysis provided the very fine digitized maps of the wildlife corridors.

Several people contributed species lists, habitat descriptions, or other ecological information that were incorporated into this report. Jim and Liz Pullman provided lists of birds, butterflies, and other animals for many of the sites visited in this survey as well as extensive plant lists for many of the original inventory sites in the 1987 Sutter publication. Norm Budnitz provided a bird list for the Brickhouse Road Wildlife Area and Tom Krakauer (Director, Museum of Life and Sciences) contributed lists for the region around the Little River. Many additional county records for reptiles and amphibians were obtained from the Museum's own collection records. Heather Potter and Jane Korest provided valuable information on Sutter's original inventory sites, revisited in 1991.

Organizational and additional editorial advice and support for this report was provided by Lynn Maguire, Liz Pullman, Hildegard Ryals and the Durham County Inventory Committee. The staff of the Natural Heritage Program also provided invaluable editorial assistance, as did Margaret Nygard, Jane Korest, Dave Cook, Scott Hartley, Tora Howard, Chuck Roe, Dave Owen, Milo Pyne, Bob Wilbur, Fred White and Ed Harrison.

Finally, this project was made particularly enjoyable by the company provided on the site visits by Norm Budnitz, Duncan Cuyler, Ed Harrison, Scott Hartley, Jennifer Howard, Harry LeGrand, Margaret Nygard, Liz and Jim Pullman, George Pyne, Hildegard Ryals, Danny Smith, Susan Tillotson, Haven Wiley, Minna Wiley and Dee Stuckey.
